SUMMARY

Software Developer who builds web applications that solve practical problems. I take ideas from simple concepts to working systems, connect the different pieces, and figure out what needs to be fixed when things don't work as expected. I'm comfortable working across different parts of an application and adapting to new requirements as projects grow.

EXPERIENCE

Leysco Ltd Backend Developer Nairobi	Jul 2025 – Oct 2025
Developed RESTful APIs in Laravel/PHP to sync real-time inventory and sales data with SAP ERP, ensuring seamless system integration. Optimized SQL and Eloquent queries for faster retrieval of SAP production data, improving dashboard load times. Automated daily export of financial and production reports to SAP using Laravel task scheduling, reducing manual workload.	
Boxleo Courier & Fulfillment Services Ltd IT Support Assistant Nairobi	Jan 2026 – Mar 2026
Provided IT support for warehouse/dispatch operations. Maintained dashboards tracking deliveries and inventory. Supported system integrations for order visibility. Managed user accounts and access control for staff systems.	
JaGedo Ltd Software Developer (Full Stack & QA) Nairobi	Apr 2026 – Jul 2026
Designed and executed manual test cases for JaGedo's cloud-based construction platform. Performed functional, regression, and UAT to ensure platform stability for contractors, builders, and suppliers. Collaborated with developers in Agile/Scrum to identify, document, and track bugs. Developed automated test scripts and built internal testing utilities to streamline regression cycles and accelerate releases. Contributed to frontend bug fixes in React/Next.js and backend API improvements in Node.js based on testing insights.	

EDUCATION

Institute of software Technologies Diploma in Full Stack Software Development	Sep 2023 – Mar 2025
ALX Africa Professional Certificate in Software Engineering	Mar 2025 – Mar 2026
IBM (via Coursera) Professional Certificate in Full Stack Software Development	Feb 2024 – Feb 2024

PROJECTS

Event ticketing system — Fullstack developer https://github.com/Peshmoh/events Built a full-stack event management platform with Node.js, Express, MongoDB, and React. Integrated M-Pesa and PayPal for ticket payments and implemented role-based access (Admin, Organizer, User) with JWT authentication.
